Education

Medicaps University

Bachelor of Technology(IT)

2020-Present

CGPA: 8.49

College of Commerce Arts and Science

XII-Science

2017-2019

Percentage: 78.6

Himalayan School

X-Board

2017

CGPA: 10

Technical Skills

Programming Languages:	Java, OOPS, Collection Framework
Web technologies:	Angular, React, HTML, CSS,
Database Management:	MySql
Miscellaneous:	Node.js, Express.js

Experience

AWS

July 2023 – August 2023

Cloud Computing Internship

- I have accomplished an extensive AWS Cloud Computing training program, enriching my expertise in deploying and managing AWS EC2 instances and efficiently utilizing AWS S3 for data storage.
- This hands-on experience has equipped me with valuable cloud computing skills, enabling me to implement scalable and reliable cloud solutions while adhering to best practices and security measures within the AWS environment.

Oasis Infobyte

October 2023 – Present

Website Development Internship

- As a web development intern, independently designed and implemented a solo project, showcasing skills in HTML, CSS, JavaScript, and front-end development.
- Developed a website, enhancing skills and gaining valuable experience. Learned extensively, honing problem-solving abilities, and deepening expertise in front-end development.

Projects

Hospital Management | *Angular, Nodejs, Express.js, MySql*

April 2022 - May 2022

- Developed an Hospital Management Website using Angular, Node.js, and MySQL
- This platform provides a comprehensive view of patient and doctor details, streamlining administrative task.
- Admins can efficiently fix appointments, optimizing patient care. Patients can easily book appointments, enhancing accessibility and overall healthcare experience.

Freelance Website | *React, Bootstrap*

August 2023 - September 2023

- Designed a freelance clone website using React and Bootstrap.
- Developed a versatile Freelance Web Application where individuals can showcase their expertise in diverse fields.
- Users have the freedom to book professionals for specific projects aligned with their expertise.
- This platform fosters collaboration and empowers users to access a wide range of services tailored to their needs.

Rent-Car Website | *React, Bootstrap*

September 2023 - October 2023

- Created a dynamic car rental website using React.js and Bootstrap, with data sourced from a JSON file.
- Designed responsive UI components for browsing, displaying car details, and handling reservations.
- Implemented a user-friendly interface, ensuring seamless navigation. Utilized React's modularity to enhance the user experience, providing efficient access to car information and reservation functionality.

Achivements

- Achieved a 5 star Java Badge on Hacker Rank.
- I've done completed 400 questions on GeeksforGeeks.
- Achieving a rank of 200 on CodeChef in a contest with 10,000 participants.
- Certification from Udemy, skilled in Java programming and data manipulation and exception handling.
